WORKING PAPER

TECHNICAL STAFF

Significant Items Week of 15 January 1979

1. [] attended a one-day meeting of the Terrestrial Information Exchange (TIE) Panel in Charlottesville, Va. The TIE Panel was established by the Mensuration Standards Group, under the direction of EXSUBCOM, to provide a forum for Community representatives to informally meet and discuss new techniques and problems associated with the collection and analysis of hand-held or low altitude photography. []

2. One of the topics of discussion during this session was the Seminar on Single Photo Perspective to be held [] this April. This will be the second running of this five day seminar given by []

[] This is an excellent course on basic rectification of "single photo" ground photography using only graphic techniques. This course is recommended to analysts who have the need to perform simple scaling from ground photography or to analysts who would like to have a better understanding of image perspective. More information will be available soon concerning the April presentation of this course. []
